

SUMMIT

ALWAYS ON. ALWAYS SECURE.

Leverage our flexible cloud computing infrastructure to deploy innovative technology solutions that accelerate your digital transformation.

Cloud Hosting Solutions

We work hard to understand your needs to create a cloud environment that's optimized for your unique IT requirements.

Virtual Desktop Infrastructure (VDI)

Empower your remote workforce with managed VDI solutions that keep your critical applications secure while making them accessible anywhere, anytime, from any device. Our team functions as an extension of your business to help you stay ahead of technology trends and protect your data against emerging cyberthreats.

- > Dedicated Virtual Environment
- > High Demand Workloads
- > Personalized User Experience
- > Subscription-Based Pricing
- > Automatic Backups

Let's Build Something Brand New Together

Unlike cloud hosting platforms that force you to build a cloud environment on their terms, we've made it a priority to collaborate with our clients to create **unique, flexible cloud solutions** that actually meet their technology needs.

If your cloud requirements don't fit into a predefined box, talk to our resourceful cloud engineers to start building an innovative solution that evolves with your business.

Private Cloud

Maintain full control over your infrastructure and data within a highly customized and secure cloud environment tailored to your organization's specific needs. Our team manages the servers while you enjoy the flexibility and cost-saving benefits of automatic scaling, resource pooling, and self-provisioning.

- > Multi-Tenant & Single-Tenant Options
- > Dedicated Server Resources
- > White Label MSP/ISV Cloud
- > Automatic Scaling & Resource Pooling
- > Customizable Environment

Complete Control

Enhanced Security

Compliance Standards

Managed Public Cloud

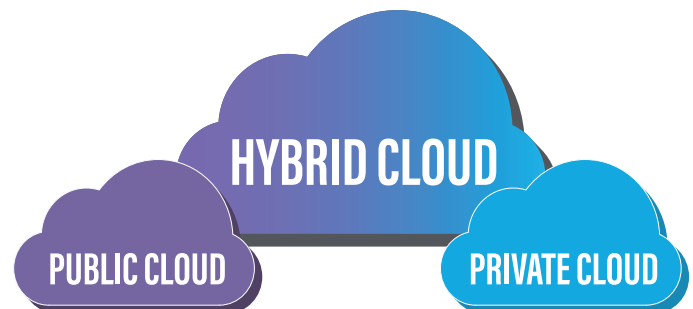

Our dedicated cloud experts handle the day-to-day management of your preferred public cloud environment, including 24/7 monitoring and guidance for optimizing performance.

- > AWS & CloudCheckr Partnerships
- > Multi-Tenant VMware Environments
- > 24/7 Network Engineer Support
- > Direct, Fully Redundant Connectivity
- > Managed Links to Third Party Platforms

Hybrid Cloud

Build a hybrid cloud deployment that keeps your essential data and applications stored in a dedicated private environment while still providing access to your choice of public cloud platforms.

- > Dedicated Servers
- > Fully or Co-Managed Options
- > Multi-Tier Data Protection
- > Low Latency Connectivity
- > Secure VPN Access

SUMMIT

ALWAYS ON. ALWAYS SECURE.

Desktop as a Service (DaaS)

Access secure virtual desktops and applications from anywhere with any device. Our flexible, subscription-based pricing plans include built-in security features like encryption, multi-factor authentication, and customizable access controls to maintain the confidentiality and integrity of data.

- > Remote Desktop Session Hosts
- > Low Hardware Requirements
- > Subscription-Based Pricing
- > Standardized User Experience
- > Automatic Backups

Application Hosting

Access your critical applications and data securely from anywhere in the world. We host your licensed software on secure, private servers managed by experienced industry professionals so you can focus on growing your business.

SUMMIT

ALWAYS ON. ALWAYS SECURE.

At Summit, your data security is non-negotiable. That's why we protect every client with our multi-faceted cybersecurity workspace solution.

Security Is Our Passion

We build industry-leading security controls into every aspect of our infrastructure to ensure that your hosting environment is protected from unauthorized access. With Summit, security is never an “add-on” luxury; it's the foundation of everything we do.

Summit Secure Workspace combines a variety of industry-leading cybersecurity tools and practices that we use to keep your data and applications secure. Because we want to provide the most secure hosting services possible, every one of our clients receives these benefits automatically when they join us.

No catches. No hidden costs. Just world-class security.
