# Sage Data & Analytics for Sage 100

Solution Factsheet

Running a business is hard. Connecting data shouldn't be.

Eliminate the complexity of traditional analytics and reporting with simplified **data management** for the **business user**. Leverage pre-built data models, dashboards, and financial reports to get immediate insights.

Get your data preparation right and transform your business intelligence with Sage Data & Analytics, powered by Zap.

Zap Data Hub **consolidates, reconciles, and enriches** your data. It sources data from Sage 100, consolidating across companies with support for full cross-module reporting.

Get the complete picture by integrating your Sage 100 data with industry leading CRMs, HRMs, and best-of-breed SaaS tools.

The Benefits of Zap Data Hub for Sage Data & Analytics

- Starting from Sage 100, Sage Data & Analytics, powered by Zap, allows your team to invest in modern analytic tools.

- Analyse cross-module, across data silos. Don't let boundary silos get in the way of a good data story!

- Sage Data & Analytics, powered by Zap, lets you leverage a **single analytic tool** for all your **financial reporting and dashboard** requirements.

- Power BI or our own Data Hub Analytics

Sage Data & Analytics powered by **Zap**

Sage Data & Analytics Integration:

Automated data collection

Optimized connectivity to Sage100 that lets you sync all your customizations as well as add in any extra data source your business utilizes, wherever your data resides.

Intuitive and powerful data modelling

Data management features to help bring in other data sources. This provides the ability to merge data and analyze your complete business.
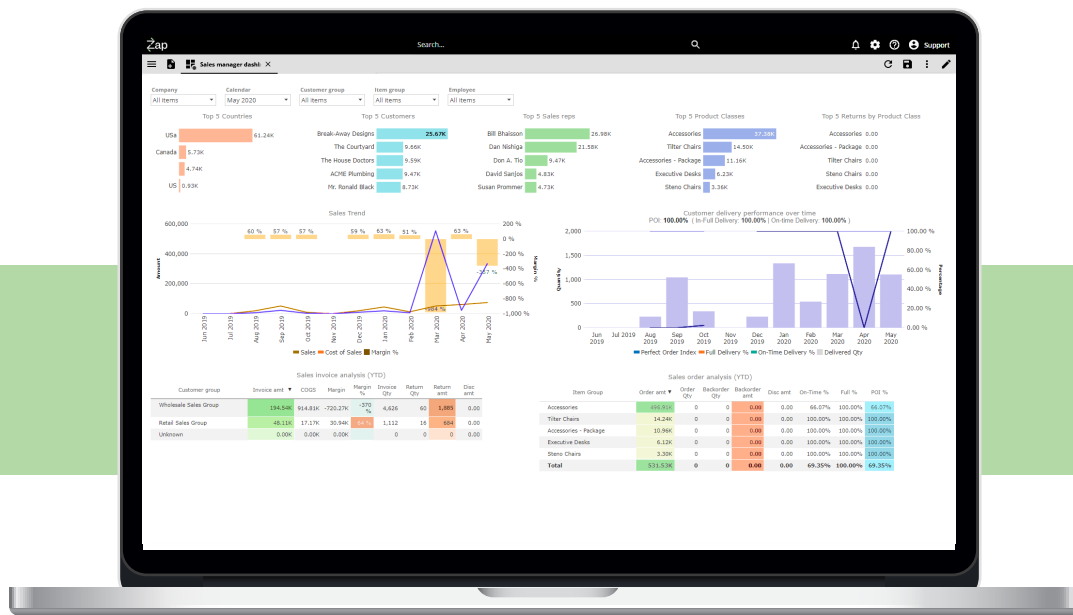

Automated data-warehouse generation and aggregated semantic layer

In addition to data modelling, Sage Data & Analytics, powered by Zap, automatically generates the data warehouse and optimizes your experience by aggregating your data and presenting it in the most user-friendly and effective manner.

Data presented within Zap Data Hub or your analytic tool of choice

The Zap Data Hub provides integrated analytic capabilities for highly interactive visualizations and flexible financial reporting. Pre-built analytics available in Sage Data & Analytics, and Power BI, can be customized, extended, embedded, or distributed.
