

## Scanco Procurement Automation for Sage 100

*Avoid material shortages and optimize cash flow.*

Procurement Automation intelligently analyzes your supply and demand to help you buy the right products at the right time, eliminating costly excess inventory.

### Control & Efficiency

- Get Faster Insight
- Increase Efficiency
- Optimize Cash Flow
- Avoid Shortages
- Retain Full Control
- Real-time Sage Integration

### Manage the entire procurement process!

By analyzing orders, minimum stock requirements, current supply, and quantities on purchase order, Scanco Procurement Automation creates a to-do list of the materials that need to be purchased.

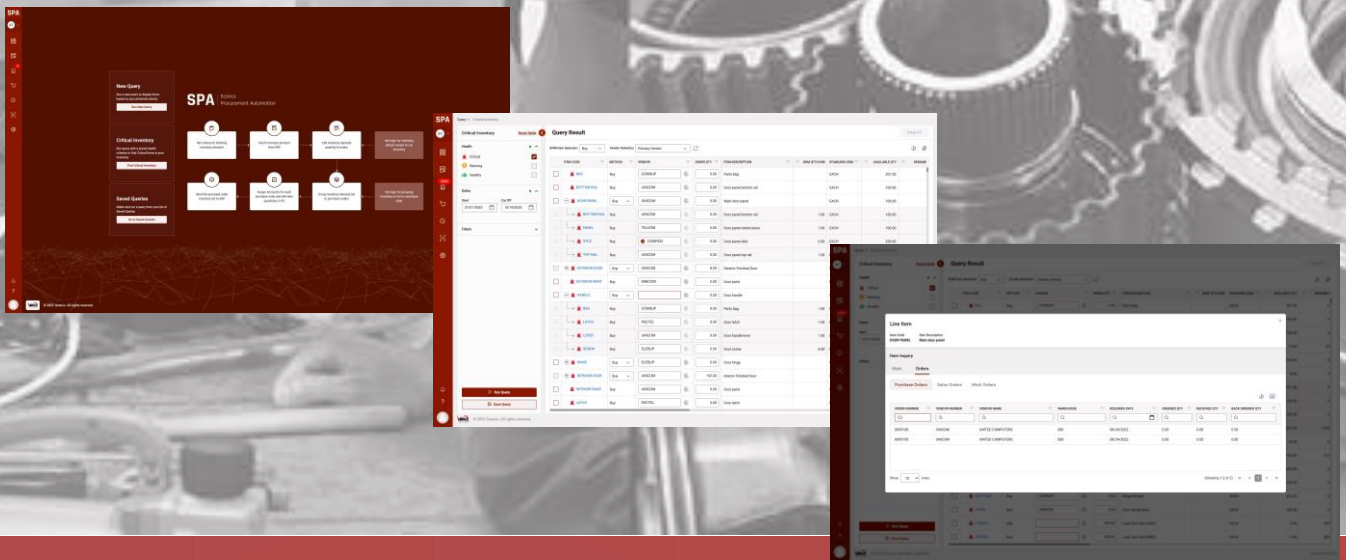

The list is then presented in an easy-to-read graphical table format, ready for your buyer to review, edit, and act upon. Scanco Procurement Automation will even generate purchase orders with the click of a button.

Scanco Payment Automation is embedded so that automated vendor payments can be set up as a part of the procurement process. Payments are secure, cloud-based, and digital via virtual payment cards ACH Plus, or eChecks.

# PROCUREMENT AUTOMATION

## 1 Determine Inventory Needs

- ✓ Easily and quickly identify critical items required to purchase/make.

- ✓ Choose a specific date range and SPA will calculate inventory needs based on sales order demand, stock levels, work ticket production, and incoming purchase orders.

## 2 Real-Time Sage Connection

- ✓ Web-based service embedded into Sage, with a real-time connection for accurate visibility.

## 3 Secure and Personalized

- ✓ Easy role maintenance, default company, and security settings for personalized access.
- ✓ Multi-level user profile settings for quick access to job-specific procurement functions.

## 4 Vendor Options

- ✓ Ability to choose the best vendor based on priority, delivery time, or price.
- ✓ Real-time access to vendor pricing schedules for effective procurement insights.

## 5 Detailed and Editable

- ✓ Dynamic 10-layer subcomponent explosion: Ensure all parent items, subcomponents, and their subcomponents are accounted for during procurement queries.

## ✓ Item-Level Drilldown

- ✓ Editable GL allocations for purchase orders.

## 6 Quick and Efficient

- ✓ Create and save procurement queries for repeat use and easy access for regular buying cycles.

- ✓ Quickly set buy vs. make assignment in procurement queries.

- ✓ Purchase order consolidation for quick review and turnaround.
