Sage Tech Partner

Cloud-Based Integrations for Sage Intacct

TrueCommerce is the most complete way to connect your business across the supply chain – from EDI to marketplaces to fulfillment and more – so you can do business in every direction.

COMPLETE SOLUTION FROM ONE SOURCE

Our end-to-end EDI solution is easy to use and provides unparalleled scalability, along with in-house support that lets you focus on growing your business. We've taken the complexity out of EDI by providing four key components of successful EDI deployment:

Connectivity with your trading partner(s) is required to transmit EDI documents, whether directly via the Internet or through a "Value Added Network (VAN). The TrueCommerce Trading Network can transmit EDI transactions to all your trading partners across the globe. It is compliant with virtually any connectivity protocol, including AS1/AS2/AS3, FTP and (if required) VAN interconnects.

TrueCommerce makes EDI painless by providing businesses of all sizes with complete, end-to-end solutions that are easy to use, robust and affordable—along with market-leading support and services to ensure your success.

Web-Based EDI Translation Software converts business documents from raw EDI data (ANSI, ASC, X12, and EDIFACT standard) into a human-readable business form. TrueCommerce Transaction Manager automatically translates your EDI documents, offering complete order visibility. The web-based architecture also enables you to manage EDI from just about anywhere.

Data Mapping and Integration provide the ability to seamlessly send and receive information between Transaction Manager and Sage Intacct through the TrueCommerce Business System Plug-In™.

This is achieved by processing EDI transactions through a collection of intelligent software modules. These modules are programmed to format your inbound EDI transactions to match against your configurations within Sage Intacct as well as match your outbound transactions against your trading partner's requirements. As your business grows and you acquire new customers, additional trading partner maps can easily be added and seamlessly integrated with your TrueCommerce solution.
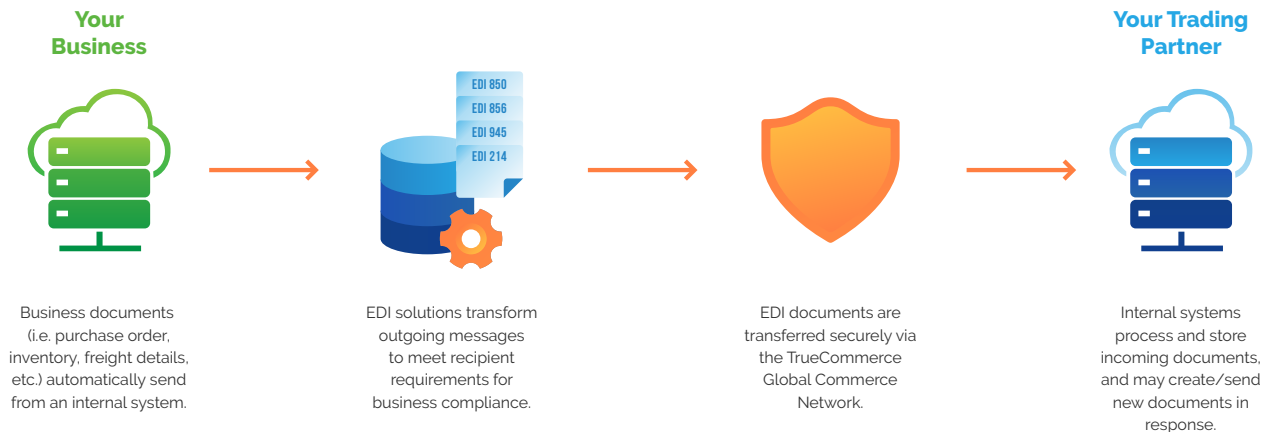

Support is a critical component of a complete, end-to-end EDI solution. Our Professional Services team has the broad range of expertise to handle not only all of your trading partners' requirements, but also any technical issues related to business system integration and the sending and receiving of your EDI documents.

We also keep a constant eye on your transactions to ensure rapid resolution of any EDI issues, and mapping updates that keep you compliant with all your partners' requirements. You can also count on the support team to provide the advice and guidance you'll need to be successful.

Even if you aren't familiar or comfortable with EDI, we'll be there to help you get up and running, step by step.

TrueCommerce™

How EDI Works

With EDI, you can automate the many steps involved in order processing, from the initial purchase order, to ASNs and shipping updates, to invoices, and more. **Here's how.**

Your Business

Your Trading Partner

EDI 850
EDI 856
EDI 945
EDI 214

Business documents (i.e. purchase order, inventory, freight details, etc.) automatically send from an internal system.

EDI solutions transform outgoing messages to meet recipient requirements for business compliance.

EDI documents are transferred securely via the TrueCommerce Global Commerce Network.

Internal systems process and store incoming documents, and may create/send new documents in response.

Integrate Your Entire Supply Chain with Sage Intacct

Choosing an end-to-end EDI solution that offers seamless integration with Sage Intacct is a strategic investment that can improve customer relationships, business agility and profitability. But that's just the beginning of what TrueCommerce integrations offer our customers!

CLOUD-BASED EDI

A cloud-based EDI integration hosted by TrueCommerce offers Sage Intacct users the benefits of anytime/anywhere, browser-based access, reduced IT costs and no maintenance, backup or update worries.

STREAMLINE ORDER FULFILLMENT

TrueCommerce integrates EDI with your Sage Intacct order management processes, including sales orders, invoices, shipments, advance ship notices (ASNs) and outbound inventory reports.

For buyers, the purchasing integration makes it easy to create and send EDI 850 purchase orders. You can also receive 855 PO acknowledgments and 856 advance ship notices (ASNs) directly into Sage Intacct.

Businesses can also automate communication with 3PLs to fulfill orders faster and more accurately. For example, inbound EDI shipment documents automatically create shipments within Sage Intacct, including the package details. You can also automatically create outbound ASNs in Sage Intacct from inbound shipments.

AUTOMATED SAFEGUARDS ENSURE COMPLETENESS AND ACCURACY

To help improve data integrity, cut turnaround time on orders and reduce errors and chargebacks, TrueCommerce EDI ensures that required data is entered correctly and will notify you of specific invalid fields or missing data prior to sending transactions. It also validates unit pricing, purchase order numbers and items before processing EDI transactions to Sage Intacct.

AUTOMATE EVERYDAY TASKS

Import and export EDI transactions at scheduled times with the TrueCommerce Scheduler add-on. To meet partners' labeling and packing requirements with one solution, the TrueCommerce Labeling add-on automates creation of UCC/GS1-128 compliant, barcoded labels, with label and packing list template updates included free. To integrate EDI with popular shipping systems like FedEx and UPS, choose the TrueCommerce Shipping Module.

CUSTOM FIELDS INTEGRATION

TrueCommerce Transaction Manager supports integration for custom fields of your choice. While a number of data fields can be integrated, shipment and delivery dates might illustrate essential data that is important when processing your documents. Regardless of which field or data type you would like to integrate as a custom field, Transaction Manager will automatically recognize and populate those fields; eliminating the need to manually re-key that data each time.

EDI IS JUST THE BEGINNING!

To do business in every direction, Sage Intacct users need to move more data faster across more channels, maximize automation and eliminate manual effort. As the most complete way to connect your business across the supply chain, TrueCommerce offers an unrivaled choice of integrations and value-added capabilities.

Connect to Marketplaces—Including Amazon

Connect Sage Intacct to leading online marketplaces like eBay, Walmart, Google, AliExpress and more than 100 other top marketplaces globally. Automatically exchange order, fulfilment, customer and inventory data between marketplaces and Sage Intacct—no more retyping. TrueCommerce can also integrate Sage Intacct with Amazon Seller Central or Vendor Central to move order and inventory data back-and-forth automatically between Amazon and Sage Intacct.

Plus, create new customers in Sage Intacct automatically for orders from your eCommerce and drop ship channels. The system checks for existing customers to prevent duplication and offers greater visibility into your online shoppers!

Connect to Storefronts

Connect Sage Intacct to leading online storefronts, including Shopify, WooCommerce, BigCommerce, and Adobe Commerce (Magento). Process online orders in minutes and automatically update pricing and inventory between your online store and Sage Intacct.

Integrate with Retailer APIs

Connect directly with your trading partners' API platforms. Our API integration lets you exchange data in real time for increased accuracy, higher performance, faster order processing, and lower costs. Keep inventory up-to-date with inventory feed automation, and enjoy fully-supported map updates for ongoing compliance.

TrueCommerce™

A TOTAL TRUECOMMERCE EDI SOLUTION FOR SAGE INTACCT FROM ONE RELIABLE SOURCE:

Easy to Use

- As intuitive to use as email
- Point-and-click functionality
- Requires minimal training to get started
- Includes a step-by-step user's guide
- Backed by 24/7 support

Connects to Any Trading Partner

- Including those requiring the use of AS2 or a specific Value Added Network (VAN)
- Over 180,000 trading partner mappings and growing
